

Evonik Donates \$5,000 To Piscataway Office Of Emergency Management Contribution To Assist Hurricane Sandy Relief Efforts

PISCATAWAY, N.J., January 31, 2013 – Evonik Corporation has donated \$5,000 to the Piscataway Office of Emergency Management. The funding will be used to assist with Hurricane Sandy relief efforts.

“We appreciate the hard work and commitment of the men and women in the Piscataway Office of Emergency Management,” said George Mossaad, Piscataway’s site manager. “Our donation is a token of gratitude to the emergency personnel who work to keep us safe. We are very grateful for their assistance. We hope the funding will help the department as they work with our community to recover from the storm.”

Hurricane Sandy, the largest tropical storm recorded in the Atlantic, made landfall in the United States on October 29 with winds of 80 mph. The death toll in the United States is more than 100. Sandy is estimated to have caused billions of dollars in property damage and lost business, making it one of the costliest natural disasters on record in the United States.

“Corporate citizenship is the cornerstone of Evonik’s operations,” said Tom Bates, president of Evonik Corporation. “Evonik is actively involved in helping make the quality of life in local communities better by participating in non-profit, charitable and community organizations. We appreciate the emergency responders’ dedication and commitment to the protection and care of our employees and neighbors. This is our chance to give back to the community.”

In recent years, Evonik has provided relief and direct rebuilding efforts following natural disasters such as hurricanes Katrina, Rita and Ike on the U.S. Gulf Coast, as well as tsunami and earthquakes in Asia Pacific.

Evonik is a specialty chemical company that creates essential ingredients for every day life. The company's products are included in such items as toothpaste, shower gel and shampoo. Evonik's silanes are essential raw materials in the electronics and telecommunications industries, while the company’s silica and silane components are

blended into rubber to make environmentally-friendly tires. Other products include fumed silicas used for coatings, adhesives and in the manufacture of cosmetics, pharmaceuticals, defoamers, pesticides, inks and batteries. Evonik is also a leading manufacturer of amino acids, having produced over one million tons of the animal feed additive Biolys® since 2000.
