

PERACLEAN® 22 CW Meat & Poultry Processing

Evonik is one of the world's leading suppliers of specialty chemicals. Our Active Oxygen business line brings together Evonik's activities in specialty chemicals to a variety of industrial applications, providing high performance solutions that are environmentally friendly and energy efficient.

PERACLEAN® 22 CW is an environmentally friendly antimicrobial agent approved for a multitude of intervention points, including both online and offline reprocessing (OLR / OFLR), spray, wash, rinse, chiller or scald, and other process water for whole or cut meat & poultry carcasses. This cost-effective product is a chlorine-free solution that produces no harmful byproducts when it breaks down into carbon dioxide, oxygen and water.

List of Evonik USDA approved FCNs listed in the FSIS Directive 7120.1

FCN No. 1662 *Poultry carcasses, parts, trim, and organs*; FCN No. 1522 *Meat & Poultry*; FCN No. 1477 *Meat carcasses, parts, trim, and organs*; FCN No. 1094 *Meat*

This information and all further technical advice is based on our present knowledge and experience. However, it implies no liability or other legal responsibility on our part, including with regard to existing third party intellectual property rights, especially patent rights. In particular, no warranty, whether express or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technological progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of a customer. Reference to trade names used by other companies is neither a recommendation, nor does it imply that similar products could not be used.

PERACLEAN® 22 CW is an OMRI and Kosher certified product for processing and meets USDA standards when used as directed for applications up to 2,000 ppm. The product helps control bacteria and helps reduce bacterial contamination that can cause product spoilage. This process-friendly product requires no rinsing, is non-foaming, and non-corrosive to stainless steel.
